Summary

Computer Science student specializing in AI & ML with expertise in Data Structures, Algorithms, and OOP concepts. Passionate about web development and creating useful applications using the MERN stack. Proficient in JavaScript, learning React, and exploring backend development with Node.js. Demonstrated leadership in managing large-scale technical events and cross-functional collaboration.

Professional Experience

Software Developer Intern

Bluestock Fintech

May 2025 – Present

Remote

- Assigned to develop a production-ready IPO website using the MERN stack.
- Collaborates across development teams to integrate features for final deployment.
- Currently leading the intern team and reporting progress to the product manager.

Academic Projects

IPO Website (MERN Stack)

- Developed a full-stack IPO listing platform with detailed comparisons of brokers and shark investors.
- Built features for investor research, real-time IPO updates, and document previews.

Hateful Meme Detection System (Python, Tesseract OCR, CNN)

- Implemented OCR and CNN-based classification to detect hateful content in multimodal memes.
- Achieved 89% accuracy using feature extraction and fusion techniques.

Technical Skills

- **Languages:** Java (DSA), C/C++, Python, JavaScript
- **Web Technologies:** HTML5, CSS3
- **Frameworks:** React.js, Node.js, CNN
- **Concepts:** OOP, Compiler Design
- **Tools:** Git, GitHub, VS Code, MySQL

Soft Skills & Methodologies

Problem-Solving | Cross-Functional Collaboration | Agile Methodologies | Deadline-Driven Execution

Education

Sikkim Manipal Institute of Technology

B.Tech in CSE (AI & ML), CGPA: 9.18

Sikkim, India

2021 – 2024

Chauhan Public School

XII (CBSE), 86.6%

India

2020 – 2022

Carmel School

X (ICSE), 90.4%

India

2008 – 2020

Position of Responsibility
